

## A - Margins

Keep in mind that when getting assembled the game board artwork might "spill" into the sides. Because of that:

1 - Keep any important information inside the margin lines.

2- Consider how will you design your artwork so it doesn't look out of place if it gets displaced.

## C - Folds

These lines indicate where the board will be folded and/or cut. This should affect your artwork.

## B - Wrapping

Remember to always extend your artwork to the bleed lines. All this area will wrap around the grey chipboard and to the back part of the game board.
